WORK EXPERIENCE

Mission Sustainability

Software developer internship

May 2023 – June 2023

NextJS.

- Worked on a full stack project involving frontend in NextJS.
- It includes creating reusable components and maintaining coding standards.
- Implemented NextJS page router for navigation & routing.

Tailwind

- Using Tailwind CSS to style components which provides a modern and clean design.
- Used to make web app responsive across all the devices.

GraphQL

- Utilized GraphQL in place of RESTful APIs for better flexibility.

Typescript

- Used to create types and interfaces improving code quality.
- Used to define schemas in sanity cms.

Sanity

- Created schemas in a way which can manipulate content of every element on the website.
- Written schemas in ensuring feature scalability.

PROJECTS

Wigle (A clothes rental platform)

February 2023

- Provides clothes **rental service** with the concept of **quick delivery** and sustainable fashion.
- Build using **Laravel** and **MySQL**.
- Includes inventory management, edit product, product filters, pincode selection, payment gateway.
- Added **Razorpay** payment gateway.

Open Source (Creative Commons)

- **Update getimagesize() Function to Accept Image Paths Instead of URLs ([Link](#)):**
 - Earlier the function used to **take an image path** as an **image url** which may not work everytime. In this PR, the **image path is replaced by image url** escaping the variables properly.
- **Add wp-cli in docker image ([Link](#)):**
 - Created a custom docker image in a DockerFile.
 - Installed and tested wp-cli in the docker image.

SKILLS

- **Languages** - PHP, NodeJS, Typescript, Python, Shell Script, Java
- **Frameworks** - Laravel, WordPress, ReactJS, NextJS, TailwindCSS,
- **Cloud Platforms** - Digital Ocean
- **DevOps Tools** - Docker, Git
- **Databases** - MySQL, MongoDB, Firebase
- **OS** - Linux, Windows
- **Design:** Figma, Canva

EDUCATION
